MLLI — SPEC Documentation

Welcome to the official SPEC platform documentation. Select your role below to get started.

Platform Workflow Overview

Available Guides

Role	Guide	Description
 Client	Client Guide	Create STFs, add patients & procedures, book transmittals
 Cashier	Cashier Guide	Patient billing, charge management, and payment processing
 Dispatcher	Dispatcher Guide	Manage and assign specimen deliveries to riders
 Lab	Lab Guide	Receive, verify, and process incoming specimens
 LSR	LSR Guide	Pick up and deliver specimens between facilities
 CMS	CMS Guide	Patient registration and transaction management

New here? Start with your role's guide. Each guide covers login, step-by-step workflows, tips, and a visual flowchart of your process.

Last Updated: April 2026

SPEC Guide — CLIENT Role

Specimen Transmittal Form (STF) Management

Your Role

As a **CLIENT**, you submit specimen transmittal requests to the lab. You create an STF, add patients, attach the required procedures, and book the transmittal for pickup.

Workflow summary: Create STF → Add Patients → Add Procedures → Book Now

Workflow Flowchart

Step 1 — Login

1. Open SPEC in your browser
 2. Enter your **email / username** and **password**
 3. Click **Sign In** → you'll land on your dashboard
-

Step 2 — Create a New STF

1. In the left sidebar, click **STF** or **Transmittal**
2. You'll see your STF list
3. Click **+ Create STF** (top-right corner)
4. A success message confirms the STF was created

5. You're now on the **STF Details** page — ready to add patients

Step 3 — Add Patients

1. On the STF Details page, click **+ Add Patient**
2. Fill in the patient form:

Field	Required?	Notes
First Name	 Yes	
Last Name	 Yes	
Patient ID / MRN	Optional	If your facility uses one
Date of Birth	Optional	
Age	Optional	
Gender	Optional	
Contact Number	Optional	

3. Click **Add Patient / Save**
4. The patient appears in the STF patient list
5. Repeat for each patient in this batch

To remove a patient: Click the **Delete** (trash) icon next to their name → confirm. You can do this any time before booking.

Step 4 — Add Procedures to Each Patient

1. In the patient list, click **View Details** for a patient
2. On the Patient Details page, click **+ Add Procedure**
3. Select the procedure from the list (e.g., CBC, Urinalysis, Blood Chemistry)
4. Specify any additional details if prompted:
 - Specimen type (Blood, Urine, etc.)
 - Quantity
 - Special instructions (optional)
5. Click **Add / Confirm** — the procedure appears in the list
6. Repeat for all procedures needed for this patient

To remove a procedure: Click **Remove** next to it → confirm.

After finishing this patient, click **Back to STF** and repeat for any remaining patients.

Step 5 — Review and Book

Before booking, confirm the following:

- ☐ All patients have been added
- ☐ Each patient has at least one procedure
- ☐ Patient names and details are correct
- ☐ No extra patients or procedures

Then click **Book Now** (bottom or top-right of the STF page).

A confirmation dialog will show a summary — review it and click **Yes / Confirm Booking**.

After booking:

- STF status changes to **Booked / Submitted**
- A booking confirmation number is displayed
- The dispatcher will see your booking and assign a rider

Typical Time Estimates

Step	Time
Create STF	~1 min
Add 1 patient	~2 min
Add 1 procedure	~1 min
Review & Book	~2 min
Total (2–3 patients, 3–4 procedures)	~10–15 min

Tips

Do:

- Double-check patient names before booking — corrections after booking are harder
- Add all procedures before clicking Book Now
- Keep your STF booking numbers for reference

Don't:

- Book an STF with missing procedures
- Use placeholder or incorrect patient data
- Add patients you won't be submitting samples for

Need Help?

Issue	Contact
Technical error	IT Support (reference your STF ID)
Workflow question	Your supervisor or facility admin
Procedure selection	Medical supervisor or procedure manual

Version: 1.0 | **Last Updated:** April 18, 2026 | **Role:** CLIENT

SPEC Guide — CASHIER Role

Patient Billing & Charge Management

Your Role

As a **CASHIER**, you manage patient billing from registration to payment. You create patient records, post charges, apply discounts, and process payments.

Workflow summary: Create Patient → View Patient → Add Charges → Apply Discount → Process Payment → View Summary

Workflow Flowchart

Login to SPEC

Create New Patient

View Patient Details

Post Charge / Add Item

Step 1 — Login

1. Open SPEC in your browser
 2. Enter your **email / username** and **password**
 3. Click **Sign In** → you'll land on the main dashboard
-

Step 2 — Create a New Patient

1. In the left sidebar, click **Patient** or **CMS**
2. Click **+ Create Patient** (top-right corner)
3. Fill in the patient form:

Field	Required?
First Name	 Yes
Last Name	 Yes
Patient ID / MRN	Optional
Date of Birth	Optional
Age	Optional
Gender	Optional
Contact Number	Optional
Email	Optional
Address	Optional

4. Click **Register / Create Patient**

5. A success message confirms the patient was created

Step 3 — View Patient Details

1. Find the patient in the **Patient List**

2. Click **View Patient** in the Action column

3. The Patient Details page opens with **4 action buttons**:

Button	Purpose
Postcharge	Add charges to the account
Discount	Apply a discount
Payment	Process a payment
Guaranteed Postcharge	Add a charge to be billed later

The **Billing Summary Table** below shows all transactions as you work.

Step 4 — Add Charges (Postcharge)

1. Click **Postcharge**

2. Browse the **Available Items** list (item name, unit price, description)

3. Click the item you want to charge — it highlights

4. Set the quantity if needed (default is 1)

5. Click **Apply**

6. The charge appears in the Billing Summary Table

Repeat this step for every item you need to charge.

Step 5 — Apply a Discount (if applicable)

1. Click **Discount**
2. Select the item you want to discount
3. Choose the **Discount Type**:

Type	Description
Senior	Senior citizen discount
PWD	Person with disability discount
Student	Student discount
Employee	Employee discount
Other	Other applicable discounts

4. Review the calculated discount amount
5. Click **Apply**
6. The discount appears in the Billing Summary Table

Repeat for other items that qualify for discounts.

Step 6 — Process Payment

1. Click **Payment**
2. Browse the **Available Items** — shows outstanding balances
3. Click the item you're collecting payment for
4. The payment amount auto-fills with the balance
 - **Full payment** → leave the amount as-is
 - **Partial payment** → enter the partial amount
5. Select payment method (Cash, Check, Credit Card, etc.) if prompted
6. Click **Apply**
7. Payment is recorded in the Billing Summary Table

Repeat for each item being paid.

Step 7 — Add Guaranteed Postcharge (if applicable)

Use this for charges that will be billed separately or collected later.

1. Click **Guaranteed Postcharge**
2. Select the item from the Available Items list
3. Click **Apply**
4. The charge appears in the Billing Summary Table as **Guaranteed Postcharge**

Note: Guaranteed postcharges have different collection procedures and are tracked separately.

Step 8 — View Billing Summary

The Billing Summary Table shows all transactions in one view:

Column	Description
Transaction Date	When the transaction was processed
Item Name	Service or product name
Transaction Type	Charge / Discount / Payment / Guaranteed Postcharge
Amount	Transaction amount
Balance	Running balance after each transaction
Notes	Additional info

Account totals to watch:

- **Total Charges** – Total Discounts – Total Payments = **Final Balance Due**

Quick Tips

✓ Do:

- Verify patient identity before adding any charges
- Apply discounts immediately after posting charges when the patient qualifies
- Record payments promptly to keep the account accurate
- Use Guaranteed Postcharge for items to be billed at a later date

✗ Don't:

- Add charges without confirming you have the right patient record
- Skip the discount step for qualifying patients (Senior, PWD, etc.)
- Leave transactions unrecorded — all billing needs an audit trail

Need Help?

Technical assistance	Support Team

Version: 1.0 | **Last Updated:** April 2026 | **Role:** CASHIER

SPEC Guide — DISPATCHER Role

Booking Management & Specimen Dispatch

Your Role

As a **DISPATCHER**, you coordinate specimen delivery by assigning bookings to riders (LSRs), transferring to different riders, or rerouting to different destination facilities.

Workflow summary: View Bookings → Select Booking → Dispatch / Transfer / Reroute → Monitor Status

Workflow Flowchart

Booking Status Reference

Status	Meaning	Your Next Action
DRAFT	Client hasn't finalized yet	Wait
BOOKED	Client confirmed — ready to dispatch	Assign to an LSR
DISPATCHED	Assigned to LSR	LSR will pick up
BOOKING_ACCEPTED	LSR accepted the booking	Monitor progress
IN_TRANSIT	Specimens being delivered	Monitor
FORWARDED	Transferred to a different LSR	Monitor
COMPLETED	Successfully delivered	Done

Step 1 — Login

1. Open SPEC in your browser
2. Enter your **email / username** and **password**
3. Click **Sign In** → you'll land on the Dispatcher dashboard

Step 2 — Access the Dispatching Module

1. In the left sidebar, click **Dispatching**
2. The **Booking Management List** opens showing all STF bookings

Columns in the booking list:

Column	Description
Booking ID	Unique transmittal ID (e.g., STF-2026-04-18-001)
Origin Facility	Where specimens come from
Patient Count	Number of patients in this booking
Procedure Count	Number of tests ordered
Status	Current state
Booking Date	When the client created the booking
Actions	View button to open details

Step 3 — View Booking Details

1. Find a **BOOKED** booking in the list
2. Click **View** — the Booking Details panel opens on the right
3. Review:
 - Origin / Destination Facility
 - Patient Information table (name, age, gender, contact)
 - Specimens / Procedures table (test name, specimen type, quantity)
 - Current status with timestamp

The panel shows three action buttons: **DISPATCH**, **TRANSFER**, **REROUTE**

Step 4 — DISPATCH: Assign to an LSR

Use **DISPATCH** when a booking is new and needs a rider assigned.

1. Click **DISPATCH**

2. A dropdown list of available LSR riders appears
3. Select the best LSR for the route:
 - Choose someone **closest to the origin facility**
 - Verify they're **available** (not already busy)
 - Check their service area covers origin → destination
4. Click **Assign to This LSR**
5. Confirm the assignment

After dispatch:

- Booking status → **DISPATCHED**
 - LSR receives a notification and begins pickup
-

Step 5 — TRANSFER: Reassign to a Different LSR

Use **TRANSFER** when the assigned LSR becomes unavailable or needs to be swapped.

Common reasons to transfer:

- LSR has mechanical issues
- LSR is unavailable / overloaded
- Route optimization needed

Steps:

1. Click **TRANSFER**
2. A modal appears — current LSR is highlighted (cannot be reselected)
3. Select a new LSR from the list
4. Optionally add a reason (e.g., "LSR vehicle breakdown")
5. Click **Confirm Transfer**

After transfer:

- Old LSR is removed and notified
 - New LSR receives assignment notification
 - Booking status → **FORWARDED**
 - All changes are logged with a timestamp
-

Step 6 — REROUTE: Change Destination Facility

Use **REROUTE** when specimens need to go to a different lab than originally planned.

Common reasons to reroute:

- Destination facility unavailable
- Specific test only available at another facility

- Client requested a different lab

Steps:

1. Click **REROUTE**
2. A modal shows the current destination (highlighted)
3. Select a new destination facility
4. Confirm the new facility can perform all required tests
5. Optionally add a reason
6. Click **Confirm Reroute**

After rerouting:

- Destination facility is updated
- Assigned LSR is notified of the new delivery location
- New facility is notified of incoming specimens

Important: Verify that the new destination can handle the specimen types and has the required equipment before confirming.

Dashboard Metrics

Metric	What It Tracks
Total Pending	Bookings waiting for dispatch
Dispatched Today	Bookings you've assigned today
In Transit	Currently being delivered
Delivered Today	Completed deliveries

Best Practices

✓ Do:

- Dispatch **BOOKED** bookings within 1 hour of receipt
- Select the LSR closest to the origin facility (shorter pickup = better specimen quality)
- Add clear notes for urgent cases or special handling requirements
- Document all transfers and reroutes with a reason

✗ Don't:

- Dispatch without verifying the LSR's service area
- Reroute without confirming the new facility can perform the tests
- Leave bookings in BOOKED status — dispatch promptly
- Skip adding notes for complex or urgent cases

Escalation Guide

Situation	Contact
Booking not appearing in list	System Admin
No available LSR	Operations team
Destination facility issue	Lab Manager
Urgent reassignment needed	Senior Dispatcher
Technical problem	IT Help Desk

KPIs to Track

Metric	Goal
Assignment Completion Rate	100% of BOOKED bookings dispatched
Average Assignment Time	< 1 hour from booking received
On-Time Delivery	≥ 95%
Specimen Integrity	Zero damage / contamination

Training Checklist

Before dispatching independently, confirm you can:

- ☐ Log in and access the Dispatching module
- ☐ Read and understand all booking list columns
- ☐ Open and review booking details
- ☐ Use DISPATCH to assign a new booking to an LSR
- ☐ Use TRANSFER to reassign to a different LSR
- ☐ Use REROUTE to change the destination facility
- ☐ Understand all booking status values
- ☐ Respond to LSR notifications and issues
- ☐ Escalate when needed

SPEC Guide — LSR Role

Logistics Service Representative (Rider / Courier)

Your Role

As an **LSR (Logistics Service Representative)**, you are the courier responsible for picking up specimens at the origin facility and delivering them to the destination (lab). You must handle specimens carefully, record temperatures, and document every step.

Workflow summary: Accept Booking → Travel to Origin → Record & Accept Specimens → Transport → Deliver at Destination

Workflow Flowchart

Step 1 — Login

1. Open SPEC in your browser
2. Enter your **email / username** and **password**
3. Click **Sign In** → you'll land on your LSR dashboard

Dashboard shows:

- **Incoming Bookings** — Dispatcher has assigned to you
 - **Pending Acceptance** — Waiting for your response
 - **In Progress** — Active deliveries
 - **Delivered** — Completed today
-

Step 2 — Accept a Booking

1. In the left sidebar, click **My Bookings**
2. The Incoming Bookings list shows all bookings assigned to you
3. Click on a booking to review:
 - Origin Facility (pickup address)
 - Destination Facility (delivery address)
 - Patient count / Procedure list

- Special notes from dispatcher

4. Click **Accept Booking**

5. Status changes to **Booking Accepted**

Only accept when you're ready to leave for pickup immediately.

Step 3 — Prepare Your Vehicle

Before heading out, verify your delivery vehicle compartments:

Compartment	Required Temperature
Refrigerated	2–8°C
Freezer	–20°C or lower
Room Temperature	20–25°C

Bring your **LSR ID** for facility check-in.

Step 4 — Arrive at Origin Facility

1. Open the booking in SPEC
2. Navigate to **Origin Facility Recording**
3. Record **PICKUP ARR** (arrival time)
4. Record current compartment temperatures:

Field	What to Record
REF TEMP	Refrigerator compartment temperature
FREEZER TEMP	Freezer compartment temperature
ROOM TEMP	Room temperature compartment

Step 5 — Accept or Reject Each Specimen

You'll see a specimen table listing every specimen to collect. For each one:

Physically inspect:

- Label — legible and intact?
- Container — correct type for specimen?
- Volume — sufficient quantity?
- Color / appearance — looks normal?

- Temperature — stored properly?

To **ACCEPT** a specimen:

1. Click **ACCEPT**
2. In the modal:
 - Optionally add remarks (e.g., "Minor label smudge but readable")
 - Select the compartment to store it in (Ref / Freezer / Room Temp)
3. Click **Confirm Accept**
4. Status changes to **ACCEPTED**

To **REJECT** a specimen:

1. Click **REJECT**
2. Select a rejection reason:

Reason	When to Use
Damaged / Leaked	Container broken or leaking
Insufficient Volume	Not enough specimen for the test
Wrong Specimen Type	Doesn't match what was ordered
Label Illegible	Can't read patient name or ID
Contaminated	Visible contamination
Improper Storage	Not stored at required temperature
Other	Explain in notes

3. Add detailed notes explaining the issue
4. Click **Confirm Rejection** — dispatcher is notified automatically

Repeat for every specimen in the table.

Step 6 — Record Departure & Leave

1. Place all accepted specimens in their assigned compartments
2. Close and secure all compartment lids
3. Record **PICKUP DEP** (departure time) in SPEC
4. Click **Mark as Out of Delivery**
5. Status changes to **OUT_OF_DELIVERY / IN_TRANSIT**

Step 7 — Transport to Destination

During transport:

- Maintain proper temperatures in all compartments
- Keep compartments sealed
- Drive safely — specimens are sensitive
- Contact dispatcher immediately if any issue arises

Step 8 — Arrive at Destination & Deliver

1. Verify you're at the correct **Destination Facility**
2. Check in with receiving staff
3. Open the booking in SPEC → navigate to **Destination Facility Recording**
4. Record arrival temperatures:

Field	What to Record
REF TEMP	Refrigerator temperature on arrival
FREEZER TEMP	Freezer temperature on arrival
ROOM TEMP	Room temp compartment on arrival

5. Record **DELIVERY ARR** (arrival time)
6. Hand over specimens to lab staff — verify count and IDs together
7. Obtain confirmation (signature or timestamp) from receiving staff
8. Click **Mark Delivery Complete**
9. Status changes to **DELIVERED / COMPLETED**

Handling Problems

Problem	Action
Compartment temperature out of range at origin	Document it, notify dispatcher — do not accept specimens if unsafe
Specimen leaks during transport	Isolate it, note it in SPEC, contact dispatcher
Vehicle breaks down	Maintain temperature, contact dispatcher ASAP, document delay
Wrong delivery address	Contact dispatcher before going anywhere else

Notifications Reference

Notification	What It Means	Your Action
Booking Assigned	Dispatcher sent you a booking	Review and accept
Accept Reminder	Booking still waiting	Accept ASAP
Record Temperatures	At origin facility	Fill temperature fields
Out of Delivery	Ready to transport	Mark as out of delivery
Delivery Complete	Arrived at destination	Record temps and confirm

Performance Targets

Metric	Target
On-Time Delivery	≥ 95%
Specimen Rejection Rate	< 2%
Temperature Compliance	100%
Zero Damage Rate	100%
Customer Satisfaction	≥ 4.5 / 5

Tips

-  **Do:**
- Accept bookings only when ready to leave immediately
 - Inspect every specimen before accepting
 - Record all times and temperatures accurately
 - Keep compartments sealed during transit
 - Confirm receipt with destination staff

-  **Don't:**
- Accept then delay going to origin
 - Accept damaged or questionable specimens
 - Leave compartment lids open during transit
 - Skip recording PICKUP ARR/DEP or DELIVERY ARR
 - Leave the destination without a confirmation

SPEC Guide — LAB Role

Laboratory Technician (Specimen Reception & Validation)

Your Role

As a **LAB TECHNICIAN**, you receive incoming specimens delivered by LSR riders, verify compartment temperatures, and accept or reject each specimen based on quality standards.

Workflow summary: Receiving Tab → Monitor IN_TRANSIT → Record Temps → Accept/Reject Per Patient → Complete STF

Workflow Flowchart

Step 1 — Login

1. Open SPEC in your browser
2. Enter your **email / username** and **password**
3. Click **Sign In** → you'll land on your LAB dashboard

Dashboard shows:

- **Incoming Specimens** — Bookings in transit to your lab
- **Pending Reception** — Ready to be received
- **Received Today** — Already processed
- **Rejected** — Specimens not accepted

Step 2 — Access the Receiving Tab

1. In the left sidebar, click **Receiving**
2. The Receiving Dashboard shows two sections:

Section	What You See
IN_TRANSIT	Bookings on their way — click to receive when they arrive
COMPLETE / RECEIVED	Bookings you've already processed — historical record

Step 3 — Monitor Incoming Bookings

In the IN_TRANSIT section, each booking shows:

Column	Description
Booking ID	STF reference number
LSR Name	Who is delivering
Origin Facility	Where specimens came from
Patient Count	Number of patients in this STF
Specimen Count	Total procedures / tests
Expected Arrival	Estimated time
Status	IN_TRANSIT or OUT_OF_DELIVERY

Prepare while waiting:

- Set up your receiving area
- Have a thermometer ready
- Alert staff that specimens are arriving

Step 4 — Record Temperature Verification

When the LSR arrives:

1. Click the booking in the IN_TRANSIT section to open it
2. Navigate to **Compartment Temperature Recording**
3. Record your **independent** temperature reading for each compartment:

Compartment	Acceptable Range	Field to Fill
Refrigerated	2–8°C	REF TEMP LAB VERIFICATION
Freezer	–20°C or below	FREEZER TEMP LAB VERIFICATION
Room Temperature	20–25°C	ROOM TEMP LAB VERIFICATION

The LSR already recorded their arrival temperatures. Your reading is an independent check-and-balance — record what you actually measure.

4. After recording all temperatures:
 - All in range → Click **PASS**
 - Any out of range → Click **REJECT**, add a note (e.g., "REF temp too warm: 9°C"), notify supervisor
5. Click **Save Temperature Recording**

Step 5 — Receive Each Specimen

Scroll down in the booking details to see the **Specimens Table**. Each row shows:

Column	Description
Patient Name	Who the specimen is from
Specimen Type	Whole Blood, Serum, Urine, etc.
Procedure / Exam	Which test this is for
Compartment	Where it was stored
Status	PENDING / RECEIVED / REJECTED
Actions	RECEIVE or REJECT buttons

To **RECEIVE** a specimen:

1. Click **RECEIVE** on a PENDING specimen
2. In the Receive Modal, confirm:
 - ☐ Label legible and intact?
 - ☐ Container appropriate for specimen type?
 - ☐ Sufficient volume?
 - ☐ Color / appearance normal?
 - ☐ No leakage or damage?
 - ☐ Temperature maintained?
3. Optionally add remarks (e.g., "Minor label smudge but readable")
4. Click **Confirm Receive** — status changes to **RECEIVED**

To **REJECT** a specimen:

1. Click **REJECT** on a PENDING specimen
2. Select the rejection reason from the dropdown:

Reason	Description
MISLABELED	Label doesn't match patient
UNLABELED	No label on specimen
INSUFFICIENT (QNS)	Not enough volume
OVERFILLED	Too much in container
HEMOLYZED	Blood cells broken down (red tint)
CONTAMINATED	Visible contamination
IMPROPER_COLLECTION	Not collected per protocol
WRONG_SPECIMEN_TYPE	Wrong type for the ordered test
WRONG_CONTAINER	Wrong tube / vial used
WRONG_PRESERVATIVE	Wrong additive inside
TIME_LAPSE	Specimen too old
DELAYED_TRANSPORT	Took too long to deliver
WRONG_TEMPERATURE	Not stored at required temp
DAMAGED_CONTAINER	Broken or leaking container
DAMAGED_ACCIDENT	Lab accident, unsalvageable
IMPROPER_HANDLING	Mishandled during transport

3. Add detailed remarks (**required** for rejections — be specific)

- Example: "Serum tube only 0.5 mL — minimum 2 mL required"
- Example: "Specimen shows hemolysis — red tint visible"

4. Click **Confirm Rejection** — status changes to **REJECTED**, dispatcher is notified

Step 6 — Complete the STF

After all specimens in the STF have been received or rejected:

1. Locate the **COMPLETE** button (upper-right corner of the booking details panel)
2. Click **Complete STF / Finish Receiving**
3. System verifies all specimens have been reviewed
4. Booking status changes to **COMPLETED** — STF is archived

You must click COMPLETE to finalize the STF. Do not leave it open after processing all specimens.

Rejection Reason Quick Reference

Label issues: MISLABELED · UNLABELED

Volume issues: INSUFFICIENT (QNS) · OVERFILLED

Quality issues: HEMOLYZED · CONTAMINATED

Collection / handling: IMPROPER_COLLECTION · IMPROPER_HANDLING · WRONG_SPECIMEN_TYPE · WRONG_CONTAINER · WRONG_PRESERVATIVE

Timing / temperature: TIME_LAPSE · DELAYED_TRANSPORT · WRONG_TEMPERATURE

Damage: DAMAGED_CONTAINER · DAMAGED_ACCIDENT

Notifications Reference

Notification	Meaning	Your Action
New IN_TRANSIT	Booking on the way	Monitor for arrival
LSR Arrived	Rider at your facility	Go receive specimens
Temperature Alert	Compartment out of range	Record and investigate
Specimen Rejected	You marked as rejected	Awaiting new specimen
STF Complete	All processing done	Move to next STF

When to Escalate to Supervisor

Situation	Action
Patient ID mismatch	Stop — escalate immediately
Specimen integrity concern you're unsure about	Flag and escalate
Equipment malfunction	Stop — report immediately
Critical abnormal finding	Notify supervisor
Unable to complete a test	Document and escalate

Performance Targets

Metric	Target
QC Pass Rate	100%
Result Accuracy	> 99.5%
On-Time Completion	> 95%
Approval Rate	> 98%

Tips

 Do:

- Always verify temperatures independently (your reading is the check-and-balance)
- Physically inspect every specimen before accepting
- Use standard rejection reasons from the dropdown
- Add clear, specific remarks for all rejections
- Process all specimens before clicking COMPLETE

 Don't:

- Accept specimens with questionable conditions — when in doubt, reject
- Skip temperature verification
- Leave rejection remarks blank
- Forget to click COMPLETE after processing all specimens
- Accept if patient identity cannot be confirmed

SPEC Guide — CMS Role

Patient Registration & Transaction Management

Your Role

As a **CMS** user, you register patients, open cases, and manage all financial transactions — charges, payments, discounts, and corporate guarantees.

Workflow summary: Register Patient → View Transactions → Post Charges → Discount / Guarantee / Payment → Done

Workflow Flowchart

Step 1 — Login

1. Open SPEC in your browser
2. Enter your **email / username** and **password**
3. Click **Sign In** → you'll land on the CMS dashboard

Step 2 — Register a Patient

If the patient already exists in TASS:

1. Click **Register Patient**
2. Begin typing patient details — SPEC automatically searches **TASS** (Treatment And Specimen System)
3. When a match appears, the form **auto-populates** with the existing data
4. Verify the information is correct
5. Click **Add Case** to associate a new case with this patient
6. Click **Save**

If the patient is new:

1. Click **Register Patient**
2. Fill in the registration form:

Field	Required?
First Name	 Yes
Last Name	 Yes
Date of Birth	Optional
Age	Optional
Gender	Optional
Contact Number	Optional
Email	Optional
Address	Optional

3. Click **Save** — the patient record is created and you're taken to their record page

Step 3 — View Patient Transactions

1. From the patient record, click **View**
2. The **Patient Transactions** page opens with four tabs:

Tab	What It Shows
Charges	Medical charges / procedures added
Payment	Payments received
Discount	Discounts applied
Guarantee	Corporate / guarantee billing

Step 4 — Post a Charge

The **Charges** tab has four action buttons: **Post Charge**, **Discount**, **Guarantee**, **Payment**

To add a new charge:

1. Click **Post Charge**
2. Select the procedure from the list (e.g., Lab test, Consultation)
3. Select the corresponding code
4. Click **Add** to add the item
5. Click **Create** to finalize and save
6. The charge now appears in the Charges tab

Post a charge before applying any discount, guarantee, or payment — all other actions depend on an existing charge.

Step 5 — Process Payment

Applicable for **walk-in patients** paying immediately.

Accepted payment methods: Cash · Credit Card · Debit Card · QR Code PH

1. Click **Payment** (in the Charges tab)
2. The payment form shows all charges with amounts due
3. Check the items the patient is paying for (all or partial)
4. Select the payment method
5. Confirm the payment amount
6. Click **Confirm Payment / Pay**
7. Charge status updates to **Paid**

Step 6 — Apply a Discount

Applicable for patients in eligible categories.

Eligible categories: Senior Citizens · PWD · Indigent · Others

1. Click **Discount** (in the Charges tab)
2. Select the charge you want to discount
3. Choose the applicable discount category
4. Review the calculated discount amount
5. Click **Save**
6. Discount appears in the **Discount** tab

Step 7 — Add a Guarantee (Corporate Billing)

Applicable when a **corporate company** will be billed instead of the patient.

1. Click **Guarantee** (in the Charges tab)
2. Select the applicable procedure
3. Select the corporate account / company
4. Verify the guarantee terms
5. Click **Save**
6. Guarantee appears in the **Guarantee** tab
7. The company will receive a bill for this charge

Step 8 — Delete a Charge

The system enforces rules about when a charge can be deleted:

Charge State	Can You Delete?	How
No payment, discount, or guarantee	✔ Yes	Click Delete directly
Has payment applied	✗ Not directly	Void first, then delete
Has discount applied	✗ Not directly	Void first, then delete
Has guarantee applied	✗ Not directly	Void first, then delete

To delete a protected charge:

1. Click **Void Transaction** → confirm
 2. After voiding, the charge reverts to initial status
 3. Now click **Delete** → confirm
-

Quick Reference

Action	Walk-in?	Corporate?	Notes
Register Patient	✓	✓	Auto-populates for existing patients
Post Charge	✓	✓	Required before all other actions
Payment	✓	✗	Walk-in patients only
Discount	✓	✓	Senior, PWD, Indigent, etc.
Guarantee	✗	✓	Corporate accounts only
Delete Charge	✓ *	✓ *	Only if no payment / discount / guarantee

*Void the transaction first if any of those have been applied.

Tips

✓ Do:

- Check for existing records before registering — the system auto-populates for known patients
- Post charges first — payment, discount, and guarantee all require a charge to exist
- Process walk-in payments immediately to keep accounts current
- Void before deleting any protected charge

✗ Don't:

- Create duplicate patient records — search first
- Apply discounts to non-qualifying patients
- Try to delete a paid charge without voiding it first
